with the aspects coded by CNSs in their qualitative narratives in caring for this group.

**CONCLUSION**

The Pandora database has demonstrated the complexity and multiplicity of components of the CNS role and its impact on care. We would recommend using a database such as Pandora in other trusts in order to provide greater clarity and understanding of this important specialist nursing role.

To access further information or a demonstration of Pandora contact NHS Innovations London at www.nhsinnovationslondon.com/contact-us/
