**FIG 1. PH TESTING AS FIRST-LINE CHECK FOR POSITION OF NASOGASTRIC TUBE**

- Revised NPSA (NPSA/2011/PSA002) alert released
- New trust documentation launched
- Junior doctor rotation
- FYI doctors attend mandatory nasogastric tube training
- Screensaver launched with an awareness day and changes introduced in radiology
- Project presented at two clinical audit meetings

*FYI = foundation year one; NPSA = National Patient Safety Agency; PSA = patient safety alert*
